

BREAKTHROUGH FOR CHRONIC FATIGUE SYNDROME, M.E. AND FIBROMYALGIA

**HOW NEUROBIOLOGY AND EPIGENETICS
POINT THE WAY TO RECOVERY**

**VOLUME 2
RECOVERY FROM
CHRONIC NEUROSOMATIC ILLNESS**

Judith Maizels, PhD., MBHMA

with

Fiona Adamson

M.Litt., Adv. Dip. Psych., MBACP

Volume 2
Recovery from Chronic Neurosomatic Illness

Contents

(still subject to editorial review, 25/11/15)

Foreword by Ruth Sewell
Acknowledgements
Preface to Volumes 1 and 2

1. Introduction

Part 1

The Epigenetics Revolution:

Transformational Epigenetics and Recovery from CFS/ME and Fibromyalgia

2. Epigenetics and How We Build New Neural Networks: Why Full Recovery is Possible
3. Epigenetic Responses to Chronic Stress
4. Chronic Stress, Telomeres, and Disease
5. Transformational Epigenetics: Therapeutic Interventions for Epigenetic Recovery from Chronic Neurosomatic Illness
6. Transformational Epigenetics for Recovery from CFS/ME and Fibromyalgia
7. The Neurosomatic Model of CFS/ME and Fibromyalgia: A Summary of the Role of Neurobiology and Epigenetics in Illness and Recovery

Part 2A

The Neurosomatic Model of Recovery:

How to Restore a Healthy Epigenetic Profile Using Neurosomatic Intelligence

1. Developing Conscious Awareness

8. Neurosomatic Intelligence: The Key to Recovery
9. Neurosomatic Intelligence and Developing Conscious Awareness
10. Learning about Bodymind Recall: Steps 1 and 2
11. Bodymind Recall and the Symptom Message: Steps 3 and 4
12. Reflection and Appraisal through Journal Writing
13. How Bodymind Focusing Alters Brain Activity and Reduces the Stress Response
14. Accordance of the NSRP with other Bodymind Focusing Approaches

Part 2B

2. Neurosomatic Intelligence and Taking Authentic Action

15. Taking Authentic Action: 1. What is Authentic Action?
16. Taking Authentic Action: 2. Conscious Reflection and Appraisal as the Basis for Taking Authentic Action
17. Taking Authentic Action: 3. The Neurological Basis for Taking Authentic Action and Sustaining Recovery
18. Taking Authentic Action: 4. Dealing with Fear, Shame, Guilt, and Anger
19. Recovery as Return from Exile: Being “Ready” to Return to One’s True Self
20. Taking Authentic Action: 5. Transforming Fears into Positive Epigenetic Change

Part 3
The Neurosomatic Recovery Programme (NSRP)

21. The Core Meaning and Purpose of Chronic Neurosomatic Illness: As the Basis for Recovery
22. Contrasts in the Emotional Origins of CFS/ME versus Fibromyalgia?
23. The Neurosomatic Model as the Basis of the Recovery Programme
24. Introducing the Neurosomatic Recovery Programme (NSRP)
25. The Therapeutic Framework of the NSRP
26. How the NSRP Compares with Emotion-Based CBT for CFS/ME and Fibromyalgia
27. Positive Strategies for Recovery
28. Supporting Young People to Recover from CFS/ME

**Conclusions: How the Neurosomatic Model
Explains Epidemiological “Mysteries” and Challenges the Current Medical Paradigm**

29. Epidemiological “Mysteries” about CFS/ME and Fibromyalgia:
Some Neurosomatic Explanations
30. Epilogue: Why it’s Time to Challenge the Current Medical Paradigm
for CFS/ME and Fibromyalgia

Appendices

Appendix 1: Mechanisms of Epigenetic Change Regulating Gene Expression

Appendix 2: How Selective Epigenetic Changes Mediate the Impact of
Early Life Stresses on Vulnerability to Illness: Full Legend to Figure 3.1
